DevOps Engineer | Cloud Engineer

DevOps & Cloud Engineer with hands-on experience in CI/CD pipelines, containerization, automation, and cloud infrastructure using Jenkins, Docker, Kubernetes, and AWS. Strong foundation in Linux Administration and scalable deployment workflows. Skilled in Google Workspace Administration and Prompt Engineering using ChatGPT and GitHub Copilot to accelerate development and automation tasks. Fast learner with strong problem-solving abilities, adaptability, and a passion for building efficient and reliable systems.

Education

Acharya Institute of Technology — BE in Information Science and Engineering (Dec 2021 – May 2025)

- CGPA: 8.1/10.0

Bellary Independent PU College (June 2019 – Aug 2021)

- Percentage: 85

BEST School Bellary (Mar 2018 – Mar 2019)

- Percentage: 84.5

Technologies

- **Skills:** C, Python, SQL, HTML
- **DevOps:** Linux Administration, Ansible, Docker, Kubernetes, OpenShift
- **Cloud:** AWS, Google Cloud Platform (GCP)
- **Other:** Prompt Engineering, Git, Google Workspace Admin

Internship

Red Hat Academy | DevOps

Completed DevOps training internship with certification at Red Hat Academy, gaining hands-on experience in Linux Administration, Ansible, Docker, Kubernetes, and OpenShift.

Work Experience

DevOps & Cloud Engineer — EV-91 Technologies (Startup)

May 2025 – Present | Bengaluru, India

- Worked on the complete DevOps lifecycle including CI/CD, automation, cloud infrastructure, and containerization.
- Built and maintained Jenkins CI/CD pipelines to automate application builds and deployments.
- Containerized services using Docker and deployed them on Kubernetes clusters for scalable and reliable operations.
- Managed AWS Cloud services including EC2, S3, IAM, VPC, and Load Balancers.
- Served as Google Workspace Admin, managing company email accounts, groups, and organization policies.
- Developed the company website using JavaScript, HTML, and CSS with extensive use of Prompt Engineering (ChatGPT + GitHub Copilot) for faster development and automation.
- Led cloud migration from AWS to Google Cloud Platform (GCP), improving cost efficiency, scalability, and deployment performance.
- Migrated EC2 workloads to Compute Engine, S3 to Cloud Storage, and CI/CD integrations to GCP.

Certification

Red Hat Certified System Administrator (RHCSA)

Issued by Red Hat | April 2025

- Demonstrated proficiency in Linux system administration, including installation, configuration, and basic networking.
- Certified to perform core system administration tasks in Red Hat Enterprise Linux environments.

Projects

Online Voting System

- Developed an online voting system using centralized database architecture with a web interface. Helps users cast votes online, reduces workload, and provides secure, real-time information.
- **Tools Used:** PHP, HTML, CSS, JavaScript, MySQL

Cloud-Based IDE

- Designed a cloud-based IDE to streamline software development using modern web technologies. Includes code editor, virtual file explorer, and built-in terminal.

Spark Diagnostics – Production Healthcare Platform

LINK :- <https://www.sparkdiagnostics642.com>

- Designed and developed a full-stack diagnostic center website with online appointment booking and admin dashboard.
- Implemented RESTful APIs using Node.js & Express with PostgreSQL (Neon) cloud database.
- Integrated AI-based chatbot for patient query assistance.
- Deployed frontend on Vercel and backend on Render with custom domain, SSL, and DNS configuration.
- Implemented email automation for real-time booking notifications.

Tech Stack: React (Vite), Tailwind CSS, Node.js, Express, PostgreSQL, Neon DB, Render, Vercel.
